OBJECTIVE

Aspiring Full Stack Developer with a strong foundation in Python, SQL, programming concepts, and problem solving. Experienced in technical training and data analytics, currently transitioning into full stack development with a passion for building scalable web applications.

EDUCATION

PG Diploma in Data Science Data Analytics

University of Calicut Oct 2025 – Present

Bachelor of Science in Mathematics

Calicut University Thunjan Memorial Gov College

SKILLS

Frontend	HTML, CSS, JavaScript (Basic)
Backend	Python, API Concepts
Database	MySQL, SQL
Tools	Git, GitHub, VS Code, Postman, MySQL Workbench
Other	Power BI, Tableau, Excel, Pandas, Scikit-learn
Soft Skills	Problem Solving, Communication, Fast Learning

EXPERIENCE

Data Analytics Trainer

June 2024 – March 2025

Beat Educations (Remote)

- Delivered technical training in Python, SQL, Power BI, Tableau, Excel, and machine learning.
- Supported students in debugging technical projects and coding issues.
- Created structured training materials and practical exercises.

PROJECTS

Predictive Maintenance System Developed an end-to-end predictive maintenance system for Remaining Useful Life (RUL) prediction using NASA CMAPSS turbofan engine data. Implemented feature engineering pipelines, XG-Boost model training, FastAPI backend APIs, Streamlit monitoring interface, Docker containerization, and automated API testing. [GitHub Repository](#)

Industrial IoT AI Energy Monitoring Platform Built a real-time industrial energy monitoring platform using Apache Kafka, Spark Streaming, Isolation Forest machine learning, FastAPI integration, and Streamlit-based monitoring for AI-driven anomaly detection and industrial system monitoring.
